

AIR **X**-HALE

- TRANSFER GRAIN FASTER
- HIGH CAPACITY ON SINGLE PHASE
- GENTLE GRAIN TRANSFER

WHY INVEST IN AIR X-HALE?

KEEP ME RUNNING

- ✓ System prevents plugging
- ✓ Easy to fix if plugging does occur
- ✓ Hands-free operations

GUARD MY INVESTMENT

- ✓ Speed control to prevent grain collision
- ✓ Lower velocity reduces tube wear
- ✓ Gentle start reduces mechanical wear
- ✓ Conserves energy and lowers utility cost

LOWER CONSTRUCTION COSTS

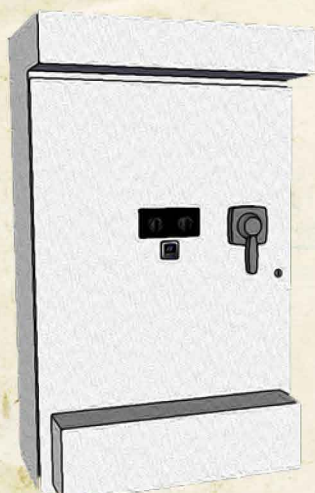

- ✓ Three phase motor reliability, even with single phase
- ✓ No controls needed, connects directly to system
- ✓ Powercom's exclusive micro-flow adjusts grain flow
- ✓ Does not require regulators, governors, or controls

"I have bought several items from Powercom because the quality is great! I can speed my blower up and slow it down to match the capacity of the grain ammount. The service is great!"

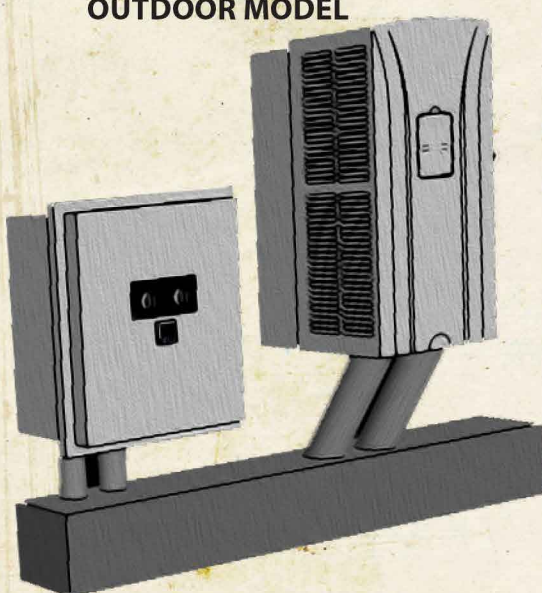

*Bill Cliff
Princeton, Kentucky*

"The ability to fine tune the blower to regulate the needs of the different bins was great! I am very happy with the services. They are the most knowledgeable in both air systems and frequency drives!"
*Phil McCherney
Edison, Ohio*
